UNIV. OF FL LIB.
DOCUMENTS DEPT.
U.S. DEPOSITORY

This Supplement contains data on U.S. General Imports of crude petroleum and selected petroleum products into the U.S. Customs area and into the Virgin Islands, by month: January-October 1974, and January-December 1973.

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140.

For sale by the Subscribers Services Section (Publications), Social and Economic Statistics Administration, Washington, D.C. 20233, or any U.S. Department of Commerce district office. Price 10 cents per copy. Annual subscription (FT 900, 975, 985, and 986 combined) $3.00.

EXPLANATION OF STATISTICS

The official U.S. statistics on imports are compiled by the Bureau of the Census from copies of the import entry and warehouse withdrawal forms which importers are required by law to file with Customs officials. The information as to country of origin, net quantity, value and commodity classification is verified by Customs officals on entries filed for transactions valued over $250, which are ordinarily subject to examination for Customs appraisement purposes. The statistics for each month are generally released about 3 to 4 weeks after the end of the given month.

The U.S. import statistics reflect both government and nongovernment imports of merchandise from foreign countries into the U.S. Customs territory, which includes the 50 States, the District of Columbia, and Puerto Rico. Shipments between the United States and Puerto Rico, between the United States and the Virgin Islands, Guam, American Samoa, and other U.S. possessions, between any of these outlying areas, and imports into U.S. possessions from foreign countries are not included in the U.S. import statistics. However, separate data on imports of petroleum and petroleum products into the Virgin Islands from foreign countries are presented in this report. (Statistics on U.S. trade with Puerto Rico and with U.S. possessions are published separately in Report FT 800. Additional data on such trade and on imports into the Virgin Islands from foreign countries are contained in reference tabulations.)

The statistics on U.S. imports are presented in terms of both "General Imports" and "Imports for Consumption." General imports are a combination of entries for immediate consumption and entries into Customs bonded warehouses, and thus generally reflect total arrivals of merchandise. Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption, and thus generally reflect the total of the commodities entered into U.S. consumption channels.

The Customs value shown for U.S. imports represents the value of imports are appraised by the U.S. Customs Service in accordance with the legal requirements of Sections 402 and 402a of the Tariff Act of 1930, as amended. It may be based on the foreign market value, export value, constructed value, American selling price, etc. It generally represents a value in the foreign country, and therefore excludes U.S. import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States. This valuation is primarily used for collection of import duties and frequently does not reflect the actual transaction value. Effective January 1974, the foreign trade statistics presented in other reports contain import value data reported in terms of f.a.s. (free alongside ship) and c.i.f. (cost, insurance, and freight) values, in addition to the Customs value data. The value information shown for imports into the Virgin Islands from foreign countries represents the dutiable value of the merchandise in the Virgin Islands.

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of importation. However, for purposes of the statistics the month of importation is based on the date of the import entry or warehouse withdrawal document. This may not in all cases correspond to the actual month of importation. (For example, under the Customs "immediate-delivery" procedures, importers may file the import entry up to 10 workdays after the actual date of importation.) Also, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of U.S. imports of about seven percent (in terms of value) of the shipments from the reported month of importation (based on the date of the import entry or warehouse withdrawal) to a subsequent month, usually the succeeding month. For Virgin Islands imports, the carryover is about four percent. In addition as a result of the aforementioned Customs "immediate-delivery" procedures, there is a further carryover of presently unknown magnitude from the actual month of importation to a subsequent month. These limitations should be borne in mind when making month-to-month comparisons.

Cumulations of data over at least 4-month periods are desirable to identify underlying trends. Month-to-month changes in imports, exports, and similar series often reflect primarily irregular movements, differences in monthly carryover, etc.

Revisions To The Statistics

Revisions are carried into the statistics on a periodic basis. Data for 1973 and 1974 appearing in the 1974 monthly issues of this report are presented as follows:

1974 Statistics

a. January through November 1974 issues: figures are as originally issued, except as noted below.
b. December 1974 issue: figures reflect revisions for prior months of the year issued with December 1974 statistics or earlier, as noted below.

1973 Statistics

a. January through May 1974 issues: figures reflect revisions issued with December 1973 statistics or earlier.
b. June through December 1974 issues: figures reflect revisions to 1973 data issued with June 1974 statistics or earlier.

In addition to the revisions which are made on a periodic basis, instances may occur where a significant error in the statistics for a month of the current year is discovered after the statistics for that month are compiled. If the error is of sufficient importance to require correction prior to the time that the regular revisions are carried, the correction is made and so noted in this or other reports.

Additional information regarding the foreign trade statistics may be obtained from the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.

[1]See page 3 for a list of the Schedule A and TSUSA (Tariff Schedules of the United States Annotated) commodities included in each item.

[2]This total includes certain commodities which were not included in the January 1974 report. (e.g., propane and butane gas, asphalt, mineral waxes, etc.)

[3]Includes motor fuels, n.e.s.

[4]Quantity data for those lubricating greases which are reported in pounds in the regular import statistics have been converted to barrels in this report on the basis of 300 pounds per barrel.

[5]Quantities are estimated from figures reported in pounds and short tons in the basic data.

[1]See page 3 for a list of the Schedule A and TSUSA (Tariff Schedules of the United States Annotated) commodities included in each item.

[2]This total includes certain commodities which were not included in the January 1974 report. (e.g., propane and butane gas, asphalt, mineral waxes, etc.)

[3]In accordance with the policy indicated in the "Explanation of Statistics" section, under "Revisions to the Statistics", data in this June 1974 issue contains revisions to the 1973 data.

[4]Includes motor fuels, n.e.s.

[5]Quantity data for those lubricating greases which are reported in pounds in the regular import statistics have been converted to barrels in this report on the basis of 300 pounds per barrel.

[6]Quantities are estimated from figures reported in pounds and short tons in the basic data.
